## Featuring~

**Speaker:** Serena Roman

**Topic:** Vandaceous Orchids

**Date:** March 9, 2023

Serena is "Lady Vanda". Like most growers, she started out as a hobbyist just like us. The name Lady Vanda started with her grandma. Once her collection got a bit out of hand, she started calling Serena 'Señorita Vanda' and 'Señorita de las Orquideas'. The latter is quite the mouthful, so Serena decided to translate 'Señorita Vanda', thus Lady Vanda was born. Lady Vanda started from her passion for orchids and nature in general. But she loves to help others find their green thumb, even when they don't think they have one. She saw an opportunity to cater to the new generation of hobbyists.

Many people find orchids intimidating and hard to care for. Serena wants everyone of all ages to be interested in orchids. She wants to help everyone start and grow their orchid collection. Through Lady Vanda Orchids Serena's goal is to help everyone feel supported through their journey with orchid cultivation. Aside from education, her focus is to bring a wide variety of plants to the public. From common Vanda Hybrids to lesser known miniature species, all plants sold are blooming size; most have previously bloomed several times and are well established. Serena's current inventory is a mixture of imported plants and plants grown from flasks purchased from other growers and hybridizers. In 2023, Serena is ramping up her breeding program and looking to bring many new crosses, especially some intergenerics to the market. Lady Vanda looks forward to another year of service with her customers, educating and supporting them as well as bringing new orchids to their collections.

# From President Kathy Kersey

I hope this letter finds you and your family well.

I want to say THANK YOU to all of the volunteers who made our 2023 show such a success. We had such an amazing set up and breakdown crew. Every one of our vendors complimented how quickly and smoothly the unloading and set up of their booths went on Friday. They couldn't stop talking about the great team we had and how appreciative they were for the help. As one vendor put it, "smiling faces and NO stress". Thank you to Belinda and Tomer for assisting Jim Roberts in setting up his display table in the lobby.

The show exceeded last year's overall attendance, which we were so happy about. We also had 19 people join our society during the show, which was great. To all of our volunteers that showed up for your shifts during the show, THANK YOU... As I have been saying forever. It's because of you, our volunteers make our show possible every year and such a success. I was so happy to see smiling faces all weekend long and it really sets the tone when our guests arrive. From Lois who greeted everyone as they came through the doors and Mary Ladd who welcomed them when she took their tickets and everyone who helped.

I want to say a special THANK YOU to our Board members and our Show Committee; Veronica Risko, Cheryl Dodes, Alan LaDuke, Barbara Barrie, Abby Diab, Janice Larit, Steve Miller, Teresa O'Neil, Adrienne Levy and Jackie Wood. You worked tirelessly all weekend, very long hours with very little rest and you were still smiling.

The breakdown team was amazing as well, helping the vendors load up what little plants they had left, removing all the tablecloths and skirts, and packing up all of the bins to go back to storage until next year. What an extraordinary show and TEAMWORK. I am so proud of each and every one of you who gave your time from Wednesday through Sunday. It definitely takes a village to put our show on every year, and you made it happen.

A SPECIAL THANK YOU to Jackie Wood and all the AOS judges for attending our show on Saturday. As you know, they are volunteers as well, and many traveled quite a distance to attend and participate in judging on Saturday morning.

I don't have the final numbers from the show, but we will give you a brief overview at our March meeting.

Please join us on March 9th for Serena Roman, Lady Vanda Orchids. We have been trying for a while to have a speaker do a presentation on Vandas. Thank you Janice for securing Serena for March. I know we all love Vandas, and I am looking forward to her presentation. I hope you can make it.

Just a reminder, If you have not paid your membership for 2023, please see Abby and Veronica at our meeting, or you can mail in your check to our P.O. Box.

Thank you again for being such a great team and being a part of such a great Society.

# Tasks for March

by Dr. Martin Motes

Whilst March never comes in like a lion in South Florida, occasionally it slinks in like a bobcat. Frost is not unheard of in the first few days of the month. The more cold sensitive genera, hard cane dendrobiums, phalaenopsis and vandas may well need some protection even into the middle of the month. Overall, however, March brings us some of the most ideal orchid growing conditions of the entire year. Dry air, low humidity and wide swings of day to night temperatures optimize both blooming and rooting of most orchids. In March, Nature gives orchidists growing outside a free sample of what life would be like with a covered green house. With little or no additional water falling from the sky and drying breezes acting like fans, we are in total control of our plants' water needs. Now, we can water properly: very heavily, and allow the plants to dry thoroughly in the near desert air before the next heavy application of water.

Attention to fertilizer in March will pay high dividends later on. As many sympodial orchids are commencing their growth cycle, now is a good time to apply slow release fertilizer to last the season. The 13-13-13, 180 day formula marketed at Home Depot as 'Dynamite' (Nutri-cote in commercial sizes) is the best available. Its plastic coating is superior to others and relatively unaffected by heat, an especially important consideration in S. Florida. Applied now it will be exhausted by September when we want to slow our plants down in anticipation of bloom and dormancy. The wide temperature swings of March also maximize the effectiveness of high phosphorous 'Bloom Booster' fertilizer. The extra phosphorous in these formulas probably does not really stimulate flowers ( most likely the opposite) but does help rooting. Two applications a week apart will speed the rooting process. Return to regular 15-5-15 fertilizer weekly thereafter as the excess phosphorus in the "Bloom Booster" interferes with minor element absorption to an inordinate degree in our highly alkaline South Florida water.

# BROS After School Orchid Program Concludes Another Successful Year

*Submitted by Bj Saul*

February was the last meeting for the students in the After School Orchid Club program. They reviewed what they learned during the year such as identifying different types of orchids, how to care for them and what potential diseases might occur. Also, their beautiful orchid coloring handout sheets that were on display at the BROS Valentine's Day Orchid Show were returned. The first and second place winners were very excited. The students were sad that the program was over and look forward to participating next year.

Special thanks to Sheila Bell, Rita Welch, and Andrea Willens for all their help by sharing their wisdom and knowledge.

If you would like to volunteer, your help would be greatly appreciated. Contact BJ Saul, [bjfsaul@comcast.net](mailto:bjfsaul@comcast.net), 561-347-0618
